10 DOOR STYLES & 20 COLORS

Unlimited Possibilities

Outdoor Cabinets Direct – 2026 Brochure

All Cabinets and accessories are made from solid ¾" High-Density Polyethylene (HDPE)

Welcome to Outdoor Cabinets Direct

Outdoor Cabinets Direct manufactures outdoor cabinets and outdoor kitchens that are 100% weatherproof. Our outdoor cabinets are made from high-quality, High-Density Polyethylene (HDPE) ¾" polymer material. Originally produced for the yacht industry, Seaboard polymer will not rust, rot, corrode, mold, mildew, or delaminate outdoors.

Our cabinetry is designed to withstand the constant punishment of being exposed to sun, salt, rain, snow, and extreme high and low temperatures. It will not fade and it never needs to be painted. It has a durable, easy to clean surface and is FDA approved for food service environments.

We not only supply our outdoor cabinets for beautiful outdoor kitchens, but also in restaurants, medical offices, theme parks and zoos, where durability and low maintenance are important. Our cabinetry comes with a Limited Lifetime Warranty to the original purchaser.

Thank you, Outdoor Cabinets Direct

Cabinet Specifications

All our cabinets are made from solid 3/4" thick high-density polyethylene (HDPE). Our cabinets are CNC machined for exact tolerances within one half millimeter. They are constructed using 8 x 35mm nylon dowels and 1-5/8 stainless steel screws. They have 3/4" thick solid backs and are completely squared at our factory. The hinges are high grade stainless steel with a 3-way adjustment.

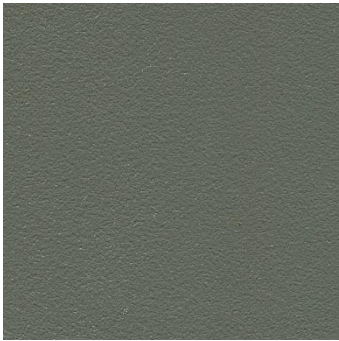

Base cabinets have a 30" cabinet box that sits on adjustable leg levelers. This allows the cabinet to be leveled on sloped exterior surfaces. The leg levelers can then be wrapped with toe-kick for a finished product. The standard base cabinet depth is 24-1/2 including the doors and 27-3/4 for grill cabinets including the doors. The drawers are made of the same 3/4" thick HDPE material, with a high-quality stainless steel full extension drawer slide. Base cabinets have a full depth adjustable shelf where applicable.

Wall cabinets are 13-1/2" deep including the door(s). Wall cabinets that are 24" high have 1 adjustable shelf. Wall cabinets that are 30" to 36" high have 2 adjustable shelves. Wall cabinets that are 42" high have 3 adjustable shelves.

There is no weatherboard, plastic laminate, composite, mdf, plywood, pvc or any other non-HDPE materials used in our 100% weatherproof cabinets.

About HDPE

HDPE plastic products are ideal for outdoor cabinetry. This solid marine-grade polymer provides excellent weatherproof quality and is FDA approved for food contact. HDPE will not warp, crack, split, or deteriorate over time, and includes a UV inhibitor to help retain its color even in direct sunlight. HDPE is designed to withstand sun, rain, snow, saltwater, and extreme temperatures up to 200 degrees Fahrenheit and below -100 degrees Fahrenheit. Other benefits of HDPE include excellent scratch resistance, rigidity, and weatherability (UV Stabilized). It will not delaminate, chip, rot, or swell and has no moisture absorption. HDPE is easy to clean and maintain and comes in several available colors.

Cleaning your HDPE cabinets

Occasionally you will want to clean your new outdoor cabinetry. Use warm soapy water and a soft cloth or a soft bristle brush to wash your cabinets. Dry them with a clean towel or cloth. You can use some furniture polish or Armor-all to shine up the finish. That's all it takes to clean your outdoor cabinets and make them look new again!

Styles and Colors

HDPE Polymer is a 3/4" thick boat board, that is ideal for outdoor cabinetry construction. It is UV and weather resistant. It was designed specifically for outdoor applications, and will withstand sun, rain, snow, saltwater and extreme temperatures. It has a durable, easy to clean finish that does not absorb moisture, and will not DE-laminate. It resists corrosion and staining and is FDA approved for food contact.
